

Lesson plan: THE SKELETAL SYSTEM

School:

Class:

Subject: Biology

Teacher:

Goals: Learn about the bones in our body and how they support us.

Book, pages, websites:

Book, pages, websites: See links in activities below.

1. Bones: <https://www.youtube.com/watch?v=ywDOiNedJvC>
2. <http://arvindguptatoys.com/toys/skeleton.html>
3. <https://www.education.com/resources/?q=humna%20body>

<u>Emotion content</u>	<u>Cognitive content</u>	<u>Action</u>
What helps you stand and move? Who are the “bones” in your life — the people who help you stand tall and feel safe? What helps you stay “standing tall” inside, even when things are hard? What happens if a part of your bones do not work properly?	Students explore the skeletal system and bone structure.	Paper skeleton model (recycling): (see link 2) Draw skeleton on A1 paper. Play interactive skeleton game. (See link 3) Make a skeleton puzzle from cardboard. Make a Prezi/Popplet presentation: The Human Skeleton.

Instructions:

Students rotate between activity stations. Teachers facilitate exploration and creativity.

Teachers’ notes:

Encourage curiosity, teamwork, and environmental awareness.
